The Lexbe eDiscovery Platform gives legal professionals an easy-to-use, flexible, and shared online application to manage the entire eDiscovery process. Now legal professionals, in one system, can easily process, search, code and produce to native, PDF, or TIFF, without having to learn or support complicated software.

Easy-to-Use and Lightning Fast

The need for good, fast, and cost effective eDiscovery applications has never been greater. The size of electronically stored information (ESI) continues to accelerate rapidly. Unfortunately, budgets, and the time allotted to review that information, has not.

The Lexbe eDiscovery Platform helps you get that time back with the fastest processing in the industry with up to 10GBs/day (~500,000 pages) processing throughput per account, available for native container and metadata extraction, de-duplication, culling, ESI conversions, OCR, and briefcase and production creation in native, PDF or TIFF. If greater throughput is needed Lexbe eDiscovery Services has a system-wide capacity to handle any job quickly. Even complex search results of large cases return in seconds. Our easy-to-use tools are designed specifically for legal professionals to do early case analysis, document review, production, fact and issues timelines, depositions, dispositive motions, and prepare for trial.

How it Works

The Lexbe eDiscovery Platform is a cloud-based, electronic document processing and management system designed to meet your needs as a legal professional. Lexbe is fast and easy-to-use and our saleable architecture allows you to manage even the largest eDiscovery jobs and cases quickly and affordably.

eDiscovery Doesn't Have to Break the Bank

Because the Lexbe eDiscovery Platform is available online we can save you both money and valuable time. With Lexbe, there are no set-up charges, no minimum contracts, or user fees. You pay only for storage used. You get the upmost flexibility to grow your business without upfront and expensive hardware, software licensing costs and support staff expenses common to litigation support.

Proven Security – Maintain Confidentiality With Confidence

Lexbe only uses the strongest security when managing your case data. We transmit and store your ESI using strong 256-bit (AES-256) encryption, the same technology used by leading financial institutions. Our U.S. based data centers provide Service Organization Controls 1 & 2 reports published under SSAE 16 and ISAE 3402 professional standards (formerly SAS70 Type II audits). Our uptime over the last 5 years has exceeded 99.999% and we provide a 99.99% uptime guarantee.

Key Features and Benefits

The Lexbe eDiscovery Platform is a Full-Featured eDiscovery Solution. Whatever your case stage or need Lexbe has a solution to meet your needs:

- **Early Case Analysis** – Analyze data and custodians, summary reports of ESI.
- **Dynamic Culling** – Defensibly remove unneeded ESI with dynamic culling by custodian, date, file type or keyword.
- **Processing and Loading** – Load native files (Outlook, Word, etc.), PDFs or TIFF/load files. We support it all. All files are converted to PDF for integrated viewing, search, and download.
- **Document Review** – Search results in seconds, unlimited coding fields, integrated native files and more.
- **Productions** – Our blended productions meet any need: natives, PDFs, TIFFs and load files.
- **Depos, Motions & Trial** – Transcript analysis, dynamic timelines, document repository, and more.
- **Full Control** – You have complete flexibility to manage and set-up cases, load documents, productions, etc., without investing in outside service vendors, saving you time and money.
- **Cross Platform Support** – Lexbe is completely web based and supports both PC and Mac users.
- **Responsive Support** – Lexbe offers multiple support options based on your needs including online and phone.
- **Custom Training and Services** – Need more help? Lexbe can also provide additional training, technical services, and eDiscovery expert consulting, as needed.
